

Take-Back Scheme

Waste Electrical or Electronic Equipment (WEEE) Directive

You can recycle your old Eden Mobility electrical equipment at any of our stores when you buy items of the same function from us **for free**

Unwanted electrical equipment is the UK's fastest growing type of waste

Many electrical items can be repaired or recycled saving natural resources.

If you do not recycle electrical items they will end up in landfill where hazardous substances can leak out.

The Waste Electrical and Electronic Equipment (WEEE) Directive requires countries to maximise separate collection and environmentally friendly processing of these items. In the UK, distributors (including retailers) must provide a system which allows all customers buying new electrical equipment the opportunity to **recycle their old items free of charge**.

Those establishing their own take-back scheme must as a minimum offer all customers buying new electrical equipment free take back of their old electricals on a like-for-like basis. As a responsible retailer, Eden Mobility are pleased to offer our customers the chance to recycle their old electrical items when purchasing a new item from us on a like for like basis.

Please speak to a member of staff for details on how to dispose of your WEEE item in-store. Unwanted items should be returned within 28 days of purchasing your new product.

To remind you that old electrical equipment can be recycled, it is now marked with a crossed out wheeled bin symbol. **Please do not throw away any electrical equipment in your bin.**
